Package Highlights

Kathmandu: Kathmandu Located in the foothills of the Himalayas; the Kathmandu Valley World Heritage property is inscribed as seven Monument Zones. These monument zones are the Durbar squares or urban centers with their palaces, temples and public spaces of the three cities of Kathmandu (Hanuman Dhoka), Patan and Bhaktapur, and the religious ensembles of Swayambhu, Bauddhanath, Pashupati and Changu Narayan. The religious ensemble of Swayambhu includes the oldest Buddhist monument (a stupa) in the Valley; that of Boudhanath includes the largest stupa in Nepal; Pashupati has an extensive Hindu temple precinct, and Changu Narayan comprises traditional Newari settlement, and a Hindu temple complex with one of the earliest inscriptions in the Valley from the fifth century AD. The unique tiered temples are mostly made of fired brick with mud mortar and timber structures. The roofs are covered with small overlapping terracotta tiles, with gilded brass ornamentation. The windows, doorways and roof struts have rich decorative carvings. The stupas have simple but powerful forms with massive, whitewashed hemispheres supporting gilded cubes with the all-seeing eternal Buddha eyes.
Pokhara: Pokhara is a metropolitan city in the Western region of Nepal. It is a valley cradled among-st mountains and hills with meandering rivers. It is a major tourist destination due to its panoramic views. Once you enter the vicinity of this city, you are greeted with magnificent views of the mountains
Chitwan: Chitwan has a particularly rich flora and fauna and is home to one of the last populations of single-horned Asiatic rhinoceros and is also one of the last refuges of the Bengal Tiger. Chitwan National Park (CNP), established in 1973, was Nepal's first National Park. Located in the Southern Central Terai of Nepal, it formerly extended over the foothills, the property covers an area of 93,200 hectares, and extends over four districts: Chitwan, Nawalparasi, Parsa and Makwanpur. The park is the last surviving example of the natural ecosystems of the 'Terai' region and covers subtropical lowland, wedged between two east-west river valleys at the base of the Siwalik range of the outer Himalayas. The core area lies between the Narayani (Gandak) and Rapti rivers to the north and the Reu River and Nepal-India international border in the south, over the Sumeswar and Churia hills, and from the Dawney hills west of the Narayani, and borders with Parsa Wildlife Reserve to the east. In 1996, an area of 75,000 hectares consisting of forests and private lands surrounding the park was declared as a buffer zone.
